Note:

Make sure that the package contains the above items. If any of the listed items are damaged or missing, please contact with your distributor.

1. Connecting the Router

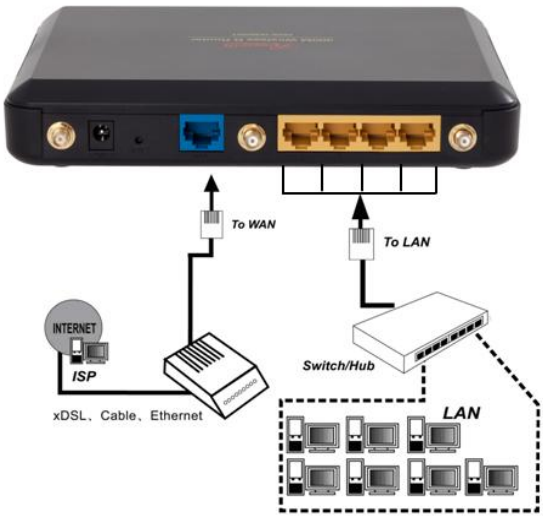

Figure 2-1 Hardware Installation of the RNX-N360RT

Before installing the Router, make sure your PC is connected to the Internet through the broadband service successfully. If there is any problem, please contact your ISP. After that, please install the Router according to the following steps. Don't forget to pull out the power plug and keep your hands dry.

1. Power off your PC, Cable/DSL Modem, and the Router.
2. Locate an optimum location for the Router. The best place is usually at the center of your wireless network.
3. Adjust the direction of the antenna. Normally, upright is a good direction.
4. Connect the PC(s) and each Switch/Hub in your LAN to the LAN Ports on the Router, shown in Figure 2-1. (If you have the wireless NIC and want to use the wireless function, you can skip this step.)

5. Connect the DSL/Cable Modem to the WAN port on the Router, shown in Figure 2-1.
6. Connect the power adapter to the power socket on the Router, and the other end into an electrical outlet. The Router will start to work automatically.
7. Power on your PC and Cable/DSL Modem.

2. Quick Installation Guide

With a Web-based utility, it is easy to configure and manage the RNX-N360RT. The Web-based utility can be used on any Windows, Macintosh or UNIX OS with a Web browser, such as Microsoft Internet Explorer, Mozilla Firefox or Apple Safari.

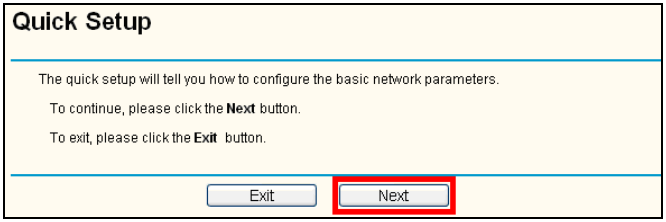
Here are step by step diagrams of the Quick Installation Guide. The detail of explanation will follow after this:

Step 1 Type http://192.168.1.1 in your Internet Browser.

Step 2 Enter the default Login name and password “admin” into the popup window and hit OK

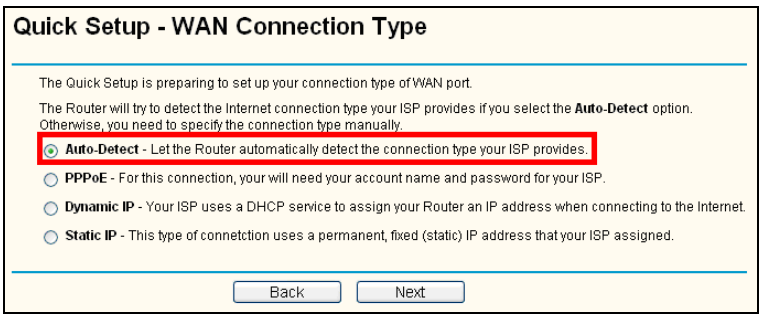
Step 3 Click on **Quick Setup**

Step 4 Click Next when sees this window



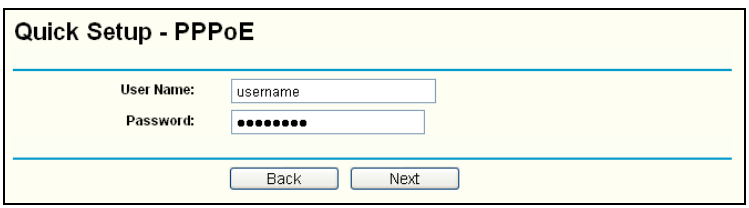
Step 5 Click **Auto-Detect** in this window as your wireless router will detect and select for you connection option.

(** If you are certain of your connection type, you can click directly to the other three selections.



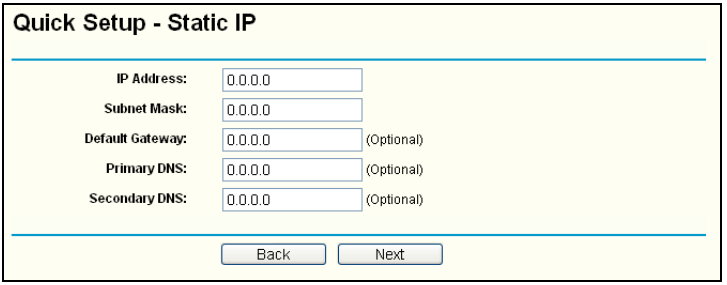
Step 6 entering your connection information in the next step. You will need to verify with your ISP.

PPPoE:

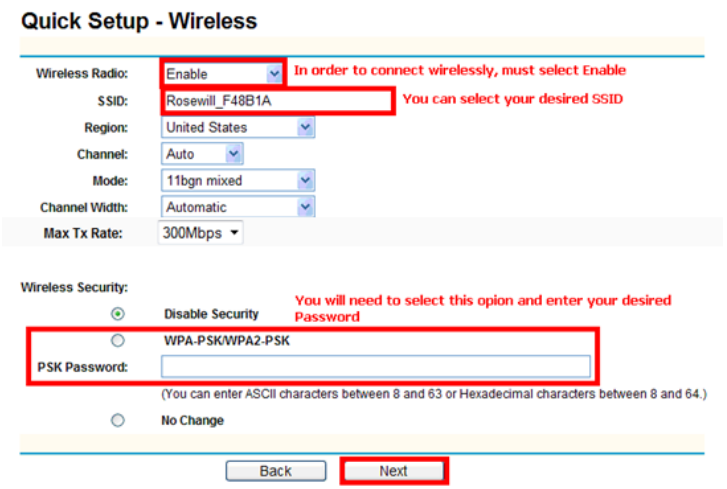


Dynamic IP: You do not need to enter anything in this option.

Static IP:



Step 7 You will need to set up your wireless signal in this step.



Step 8 Click **Finish** and you are ready!
